

MacDougall Drive 2025

2. MX to Guatemala

\$1 = 7.6 Quetzal

1 Peso = .37 Quetzal

Exit MX:

Exit from Mexico with a USA vehicle , we been in Banjercito first, that is inside of the “oficina Migración Mexico “ for get the deposit back.

The lady went outside to take picture of the vehicle and VIN.

We go back inside and we finish in 15 minutes.

After we been to the office in the same building to stamp passport for the exit. They want back the FMM form and the receipt. they keep it.

We are ready to enter in Guatemala!

Enter GUAT:

After paid 20 pesos for the bridge we enter in Guatemala with USA vehicle. First on the way pay 18 quetzal for fumigation.. you pass with the car inside one arch (with closed windows)..keep going..and that spray very quickly some liquid..

You enter in a parking and you have on your left the office for stamp your passport and fill up one form(your country your destination etc..), you have to say that you have a vehicle, they give you one number, they stamp your passport and send you in front in one building where you have to get you permission for the car .. there they want original and one copy of that document: -Driver license

-Title or compatible document of the car(we had the registration of the car where figured the name of the owner and information of the vehicle)

-Passports(2 copy, one of your details and one of the page with the enter stamp in Guatemala)

(They make this copy in a shop outside)

After that they give you a form to pay 160 quetzal on the window just in front same building(that is a bank desk) .

Than you have to return the receipt on the custom window and is done.

They come outside to check your VIN and quick inspection and they put a sticker on your wind shield.

You ready to go!

Don't forget the TIP form (they keep one and they give you one) you have to present this form when you leave the country. If you don't have it is a big problem.

We where checked again immediately after leaving the parking(our passport, permits of vehicle and another quick inspection inside of the vehicle)

So we are ready to go after 1h and 30 min.

The employees where prepared and friendly.. just slowly and this process is a bit confusing and messy..
